

# Pre-Season 2019/20

As the Build Season kicks off here is a mini overview of everything that happened over the pre-season.

---

We had the amazing opportunity to greatly serve our community in many different ways, from helping recycle to helping at the food bank. Windsor and the surrounding communities greatly support our team, therefore it is our

duty and privilege to return the favor!

---

Now to make a robot, our team needs money so our devoted team members ventured to local businesses to fundraise. Through our efforts and our sponsors we were able to raise over a thousand dollars! Our website will soon be updated to list all the sponsors. Here are a few:

---

**OTIS**

**BURTECK**  
PROVIDING GLOBAL SOLUTIONS LLC

  
**TOWN OF WINDSOR**  
*First in Connecticut. First for its citizens.*

 **AERO GEAR**  
*Insist on Excellence*

 Windsor/Windsor Locks  
Rotary International

**WINDSOR**  
PUBLIC SCHOOLS

---

Finally, as we begin to enter the Build Season our team begins to divide into four subgroups: Web, Build, Programming, and Imagery. Students can choose one or more of these subgroups to ensure we are well prepared for the competition. Note that students must contribute 50 build hours during the six week Build Season. These 50 hours are not too difficult to achieve so do not stress and just have fun!
